Competition Scoring:

1. Top five finishers (must have five finishers!) based on place in age group division, not on finish time. I.E. Similar to high school cross country scoring.
2. Qualifying teams must include at least one female. If a female is not in the top five, the fifth man will be dropped and the next-best finishing female will be included
3. Placings from all individual events (Sprint , Olympic, or Elite) are used, so the winning teams can be composed of members from the long or the short events. Relay results are not included.
4. Scores (age group division place number) are summed for the final score. Like in golf, low score determines winners.
